

Editing an Auction Member

Last Modified on 10/10/2016 5:17 pm AEDT

All bidders are required to register before they are eligible to bid on an item. Once they have registered they become a member of your Auctions Database. You are then able to edit these members if you become aware of changes in their contact details.

Quick Steps: Go to **Auction > Members > Edit**

1. Within the Management Console, select **Auction** from the top menu, then **Members** from the left menu.
2. Find the member that you wish to edit, and click **Edit** next to their name.
3. Once you've updated their information, click **Save**.

All registered bidders will display in your members listing in AuctionDesq. If you have a member database with SportsTG, this will not automatically allow them to bid on your auction items, they must reregister for the Auctions Database.
