

Adding Player Statistics

Last Modified on 26/10/2016 1:15 pm AEDT

When setting up a sport, you are able to set up standard player statistics and competition administrators are then able to enter these into the Management Console through the Results area. This allows administrators to track individual player achievements as well as team ones.

Quick Steps: Go to Competitions > Competitions > Select the relevant competition > Results > View relevant round > Players > Edit

Adding PLAYER STATISTIC INFORMATION:

1. Within the Management Console, select **COMPETITIONS** from the top menu, then **COMPETITIONS** from the left menu.
2. Select the relevant competition from the listing, then **RESULTS** from the expanded left menu.
3. Click the **VIEW** icon next to the relevant match.
4. Go to the **PLAYERS** tab.
6. Select **EDIT** on the page.
7. Next to each player's name you can then enter their Position and Number, as well as enter their match statistics based on the Player Statistics available for that sport.
8. Click **SAVE**
