

Points aren't calculating as Set in the Options

Last Modified on 25/10/2016 12:28 pm AEDT

There are times when the points tally in your ladder are not adding up as they should. This is generally an error caused by the points system having been edited since the fixture was generated

To fix the above scenario please follow the below steps

1. Go into your competition
2. Select Fixtures from the left hand side
3. Edit and save each game that has been generated in the fixture without changing any of the details

By editing and saving the fixture it consolidates all of the settings for that match including the points system to be applied to each result

If you have completed the above procedure and the points are still calculating incorrectly or the above scenario does not apply to your situation please contact our support team
